

An Innovative Performance

Deserves An Encore.

Encore[®], from Truth Hardware, is an innovative window hardware system that offers an advanced operator and lock combination—it's an outstanding performer in casement and awning window hardware. The operator's lower profile, interchangeable cover, and folding handle virtually disappears for better aesthetics. With fully concealed locking and sequential engagement, Encore's lock smoothly gives you trouble-free locking action, even in roundtop window applications. Ask about our Encore options for vinyl windows.

Try out Encore today—it's ready to perform for you.

From the number one name in window hardware innovation.

For more information visit www.truth.com
or call **1-800-866-7884**.

Encore offers a number of new features unique to the window industry—including a built-in construction handle.
