

Setting The Standard With Simplicity And Style.

Fusion™ System

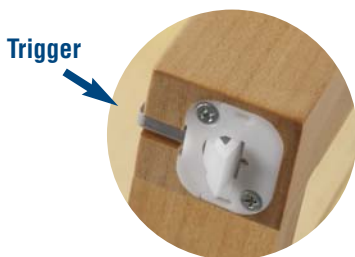

The Superior Choice In Double-Hung Window Hardware.

*Truth Hardware
brings you the most
innovative and
versatile combination
lock and tilt latch
available today!*

The Fusion™ System from Truth Hardware has moved double-hung window hardware from ordinary to exceptional! Innovative yet intuitive, the Fusion System allows the tilt latches to be hidden in the check rail and actuated by a single lock/tilt latch mechanism - if your application requires more than one lock, the Fusion System can handle that too! Your customers will love the low-profile push-on cover, not only for its style, but also for the ease it provides in painting or staining their window.

When sash is pushed back to the closed position-the trigger will activate the tilt latches

Tilt latches extended
