

Sentry™

Multi-Point Hinged Patio Door System

Inspired Hardware

Since 1955, Truth Hardware has focused on the design and manufacture of the finest operating hardware for windows and patio doors. With engineering and manufacturing teams working side by side, Truth Hardware is a true engineered solutions provider committed to making the right products, for the right market, at the right time. Truth's new Sentry™ Multi-Point Hinged Patio Door System is a testament to that mission.

As much as Truth is measured by the products we manufacture, we also realize how important are the values that help define us. At Truth, we are much more than simply your hardware supplier, we're also:

Resourceful—to meet the needs of leading window and door manufacturers

Responsive—quick to act on designing innovative new products and solutions

Knowledgeable—dedicated and experienced, we understand the market and the requirements our customers need to address

Collaborative—we listen and work with you to customize unique solutions

Flexible—committed to working alongside you to meet your business requirements

The result? A process that fosters innovative products, and unique solutions to fit your customers needs. Take a look at our products and services and you'll soon see why the Truth name is specified by homeowners, builders and architects alike. Truth Hardware – truly better from every perspective.

Commitment to Security, Sensitivity to Style

A detailed close-up of a multi-point locking system installed on a light-colored wooden door. The system features a central silver-colored metal lock body with two rectangular keyholes. To the left of the lock body is a black handle with a curved, ergonomic design. Above the handle is a black rectangular strike plate. To the right of the lock body is a long, vertical silver-colored metal track with multiple locking points, each secured by a small black pin or bolt. The track is mounted on the edge of the door. The background is a plain, light-colored wall.

Multi-Point Locking System

Innovative and Secure

Designed specifically for the North American market, the new Sentry™ Multi-Point Hinged Patio Door System from Truth Hardware combines all the innovative features you are looking for with the superior quality and performance that you expect. You can now purchase your hinged patio door hardware from the same reliable manufacturer you have come to trust for your window and sliding patio door lines.

Multi-Point Locking System Features:

- North American designed dead bolt configuration with 90 degree thumbturn
- Active hardware is available in 3 point or 5 point tongue, hook, or shoot bolt versions to meet your desired performance requirements
- Passive hardware is available in either a handle activated eurogroove version or a manual single lever flush bolt
- 16 mm or 20 mm faceplates to fit standard eurogrooves
- Truth's unique "Duo-Glide" lock mechanism is superior to standard single drive systems. The "Duo-Glide" two-way action balances the lock system providing smoother, quieter, and easier operation. "Duo-Glide" allows the lock points to engage in tension rather than compression thereby reducing stress on other elements of the lock system for longer life.
- Center latch can be reversed with the hardware installed in the door
- When dead bolt is activated, center latch cannot be depressed thus producing an added measure of security
- Dead bolts and shoot bolts have 1" of throw
- Anti-back drive feature prevents tampering with dead bolt and remote lock points
- Wear strip prevents marring of center strike plate

Tongue option fits standard 16 mm or 20 mm eurogrooves without additional remote lock processing

Independent dead bolt feature allows you to secure the door without engaging the remote lock points

Reversible latch and self-positioning anti-slam device provide a non-handed system

Hook Bolt option creates secure lock-up

Dual-direction manual flush bolt option for inactive panel

Shoot bolts can be added to hook or tongue versions to improve DP performance

Robust and Reliable

The Sentry™ Adjustable Guide and Set Hinges provide vertical and horizontal adjustment for a perfect fit. The Sentry™ Hinges are manufactured from extruded brass or aluminum for superior strength and excellent corrosion resistance.

Adjustable Hinge Features:

- Industry standard 4" x 4" foot print with 5/8" corner radius allows for single pass routing pattern
- Exceeds ANSI Grade 3 spec requirement by achieving 350,000 cycles on panel weights up to 220 lbs
- Exceeds ASTM F476 Grade 30 impact specification
- Equipped with non-removable pin for maximum security
- Set and Guide Hinges are easily adjusted using same hex key
- Intuitive indicators allow for accurate vertical and horizontal adjustment
- Set and Guide hinges work in concert with one another by allowing simultaneous vertical and horizontal adjustments
- Composite bushings provide noise-free operation

Adjustable Hinges

Handles

Multiple handle choices available

North American 90 degree thumbturn located above the handle

Stylish and Secure

The Sentry™ Hinged Patio Door System is filled with options. From traditional to contemporary, there are distinctly different handle designs to help customize your look.

Handle Set Features:

- Thumbturn above the handle allows for easier access to key cylinder
- Available with painted finishes over zinc or decorative finishes over brass, including PVD
- Industry standard 92 mm spacing between handle and thumbturn
- Family look now available for sliding and hinged door solutions
- Longer spindle and mounting screw kits available to fit thicker doors
