

# Sentry™

Multi-Point Locking Hardware  
for Operable Sidelites

# Truth Presents

## The New Sentry™ Sidelite Hardware

A market driven solution for operable sidelites - the perfect complement to the Sentry™ Multi-Point Hinged Door System.

### Flexible

The Sentry™ Sidelite Multi-Point Locking System can be customized into 3 point tongue or hook versions. Featuring a modular design, this system easily accommodates different door sizes.

### Reliable

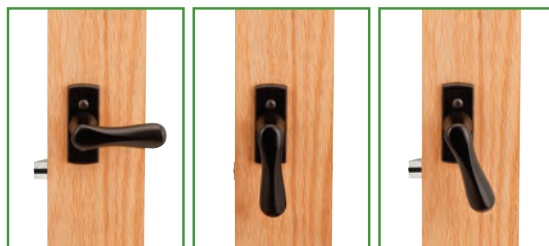

Positive Detent prevents handle sag over time, while corrosion resistant 300 series SST faceplate ensures the good looks and performance of the product for years to come.

### Smooth Ergonomic Operation

Truth's operable sidelite hardware combines a convenient center latch with an ergonomic easy to operate handle. Operating the handle down by 90 degrees retracts all lock points while providing an easy to grip handle for opening and closing the panel. Releasing the handle allows for the center latch to reset providing automatic latching upon closure of the panel, this feature retains the panel against the weather strip to allow for easy engagement of the remote lock points.

### Visually Intuitive

The Sentry™ Sidelite System provides a visually intuitive indicator of the locked and unlocked status of the sidelite panel as shown below. When the handle is released after opening it automatically returns to the latched position. To engage the remote lock points simply rotate the handle to the locked position.

### Installation Friendly

The center latch can be reversed with the hardware already installed in the door. Truth's Sentry Sidelite System is available with 16 and 20 mm faceplates to fit standard eurogrooves.

# Customizable

SUPERIOR DESIGN  
AND OUTSTANDING QUALITY

Tongue option fits standard 16 mm or 20 mm eurogrooves without additional remote lock processing

Wear strip prevents marring of strike plates

300 Series SST Faceplate

Modular system with quick easy pin-hole connection

Hook Bolt option creates secure lock-up
